Forecast for Saturday 07 Nov 2020

Weather: There may be a few mist or fog patches in some of the valleys overnight and into the morning, over inland parts of the area, but these will be shallow. The mountains will remain clear and the morning will be fine and dry with long spells of unbroken sunshine. Some high cloud will arrive in the afternoon this eventually thickening enough to blot out the sun and bring the odd shower.

Chance of cloud free mountain/hill tops above 700m: More than 95% until mid evening then falling 70% as the chance of some capping cloud increases.

Visibility: Other than those very localised shallow glen mist or fog patches it will remain good by day.
